Abstract

This document provides guidelines for designing user agents that lower barriers to Web accessibility for people with disabilities (visual, hearing, physical, cognitive, and neurological). User agents include HTML browsers and other types of software that retrieve and render Web content. A user agent that conforms to these guidelines will promote accessibility through its own user interface and through other internal facilities, including its ability to communicate with other technologies (especially assistive technologies). Furthermore, all users, not just users with disabilities, should find conforming user agents to be more usable.
In addition to helping developers of HTML browsers and media players, this document will also benefit developers of assistive technologies because it explains what types of information and control an assistive technology may expect from a conforming user agent. Technologies not addressed directly by this document (e.g., technologies for braille rendering) will be essential to ensuring Web access for some users with disabilities.

Status of this document

This section describes the status of this document at the time of its publication. Other documents may supersede this document. The latest status of this document series is maintained at the W3C.

This is the 17 December 2002 Recommendation of "User Agent Accessibility Guidelines 1.0." This document has been reviewed by W3C Members, the disability community, software developers, and other W3C groups and interested parties, and has been endorsed by the Director as a W3C Recommendation. It is a stable document and may be used as reference material or cited as a normative reference from another document. W3C's role in making the Recommendation is to draw attention to the specification and to promote its widespread deployment. This enhances the functionality and interoperability of the Web.

This document was produced by the User Agent Accessibility Guidelines Working Group (UAWG). The goals of the UAWG are described in UAWG charter. The complete list of changes to this document is available on the Web.

The UAWG also provides additional resources to support this document (e.g., Frequently Asked Questions (FAQ) about UAAG 1.0, implementation reports, and test suites). Please consult the UAWG home page for more information.

Patent disclosures relevant to this specification may be found on the Working Group's patent disclosure page in conformance with W3C policy.

The list of errata for this document is available at http://www.w3.org/WAI/UA/UAAG-errata. Please report errors in this document to wai-uaag-editor@w3.org.

Please send other comments about this document to the public mailing list w3c-wai-ua@w3.org; public archives are available.

The English version of this document is the authoritative version. Translations into other languages may be available at http://www.w3.org/WAI/UA/UAAG-translations.

This document is part of a series of accessibility documents published by the Web Accessibility Initiative (WAI) of the World Wide Web Consortium (W3C). WAI Accessibility Guidelines are produced as part of the WAI Technical Activity.
A list of current W3C Recommendations and other technical documents can be found at the W3C Web site.

Table of contents

Abstract
Status of this document
1. Introduction
   1.1 Relation to WAI accessibility guidelines
   1.2 Target user agents
   1.3 Known limitations of this document
   1.4 Relation to general software design guidelines and other specifications
   1.5 Security considerations
   1.6 User control
2. The user agent accessibility guidelines
   1. Support input and output device-independence
   2. Ensure user access to all content
   3. Allow configuration not to render some content that may reduce accessibility
   4. Ensure user control of rendering
   5. Ensure user control of user interface behavior
   6. Implement interoperable application programming interfaces
   7. Observe operating environment conventions
   8. Implement specifications that benefit accessibility
   9. Provide navigation mechanisms
   10. Orient the user
   11. Allow configuration and customization
   12. Provide accessible user agent documentation and help
3. Conformance
   3.1 Conformance profiles
   3.2 Conformance claims
   3.3 UAAG 1.0 requirements in other specifications
4. Glossary
5. References
   5.1 How to refer to this document
   5.2 Normative references
   5.3 Informative references
6. Acknowledgments
